DS Dash: GDPR Partners Package

DS 
COMPLIANCE

Who are **DS-Compliance**?

Leadership stems from the top down. The impetus to grow successful business is stimulated by senior and proven leaders.

Founded by senior management who, as Directors, led sectors at Building Societies, PWC and BT, **DS-Compliance** offers a single point of contact for all cyber security issues.

- From GDPR and Compliance regulations to forensic discovery, DS-Compliance covers it all.
- Certificated and highly experienced Data Security Experts
- Linked with highly experienced Police Investigators
- Managing and ensuring the Security of Data.

Introducing **DS Dash: GDPR**

DS Dash: GDPR[®] is an online, cloud-based platform demonstrating accountability & security breach tracking under GDPR & other compliance laws.

Key Features

- Available as wholly white labelled solution.
- Integrates with third party technology.
- One stop resource for GDPR management.
- Essential DPO and CISO Support Platform.
- IBM ESA Partner.
- Deals with time-consuming compliance demands.
- Alleviates challenges businesses face - legislative changes, monitoring, data breach support and subject access request management.
- The unique Case Room feature provides a curated space for template, document and material storage, including privacy statements, evidential records, voice files and transcriptions.
- Incorporates additional services available from Anti Money Laundering (AML) and Know Your Customer (KYC) management to Voice Transcription to Penetration Testing and Data Mapping.

Stage 1: Audit

- Onboarding process which audits any existing GDPR setup
- Recommends options for improvement and help. Each section offers a range of questions that expose sales opportunities.

For example Cyber Security Processes creates opportunities to upsell/cross sell other portfolios.

New method for gathering data

Organisation report test organisation thursday 25th June 2019

Stage 3: Tools

- Plugs in to 3rd party tech such as voice recordings.
- Automatic alerts based on found GDPR references.
- Built-in templates for third party data agreements, internal documentation and policy statements.
- Interacts with other technologies and services to provide a single point of access.

The screenshot displays the TechData:GDPR interface. At the top, there is a yellow header with the logo. Below it, a breadcrumb trail reads 'dash > Practically.io > Test Organisation > Voice Alerts'. The main content area is divided into two sections: 'Audio: Possible SARs Request' and 'Transcript: Possible SARs Request'. The audio section shows a waveform and playback controls, with metadata indicating 'Source: Call Center' and 'Recorded on 20/11/2019'. The transcript section shows a conversation between two speakers. Speaker 2 asks for cancellation and confirmation of a no-claims discount. Speaker 1 responds that they want to exercise their 'right to be forgotten' under GDPR. Speaker 2 confirms this and mentions 'our GDPR policy'. Speaker 1 says 'Perfect. That's great.' and Speaker 2 says 'All right, thank you very much for your time.' Speaker 1 says 'Yes. Thank you.' To the right of the transcript, there is a sidebar with four action buttons: 'Action as SARs Request' (with a warning icon), 'Action as DPIA/Breach' (with a warning icon), 'Ignore for GDPR' (with a crossed-out circle icon and a note 'File & transcript won't be deleted'), and 'View all Voice files' (with a document icon).

Operational Benefits

- Competitively priced annual licence model to support essential GDPR & data compliance.
- Sector independent.
- Organisations holding high volumes of customer data.
- High numbers of staff & staff turnover.
- Ease of implementation: Not dependent on complex integrations or costly IT.
- Strong commercial imperative: Non-discretionary purchase fulfilling essential risk/compliance tasks.
- Licence model provides foundation for consultancy work and longer-term recurring compliance revenue via outsourcing such as DPO services.
- Revenue generation via direct selling, partnerships with technology resellers, third party referrals via accountancy and law firms and direct marketing using social media.

USPs

- Over-arching platform that integrates with other technologies.
- Single point of Resource to manage GDPR and other regulations.
- Modular services – customers decide what they need.
- Reinforced by Thought Leadership Consultancy.
- Case Room feature provides a curated space for template, document and material storage, including privacy statements, evidential records, voice files and transcriptions.
- Upcoming ISO Compliance Module.

Why Now?

- Compliance obligation is becoming increasingly stringent, organisations need a single point of control to manage issue(s).
- Training processes leave gaps in human awareness and technology is a key weapon to support personnel.
- Covid19: Driving additional online transaction volumes.
