

Thought Leaders and Industry Experts Discuss The Cost of Shock™

Date and time: Friday 14th February 2020, 09:00am - 12:30pm
Location: Metrobank, Holborn, London, WC1B 5HA

Seminar Overview:

The Cost of Shock™ is the price business pays to react to a crisis rather than managing compliance and cybersecurity processes throughout the year.

The savings are immense

- Opportunities for fraud, breaches and losses are minimized – it is estimated that with robust procedures in place, the likelihood of a successful attack is reduced by 85%
- The price of failure is untenable: Companies closed, reputations damaged and Directors fined and imprisoned
- Brands are better protected and build trust with customers
- Combining Compliance and Security procedures delivers evidential weight and keeps your business up to date with the relevant Compliance Requirements

Typical Cost of Shock Incident Management EXCLUDING Expert Support, actual losses, brand damage, business disruption, affected share prices and investment.
